Computer Science Technology
Dawson College, Montreal, QC

September 2022 – Present

Work Experience

Software QA/CQA Tester

March 2018 - September 2022

Keywords Studios - Level 3 Tester

- Software Testing Experience
- Wrote Bug Reports on Jira.
- Troubleshoot Software during testing when there would be inconsistent results for a test.
- Created documentation for project standards for reports and testing procedures.
- Trained New Testers on projects to speed up their learning of project specific standards.
- Lead Groups of Testers in large scenarios where coordination is needed.
- Worked directly with developers to communicate intended vs unintended behaviours and possible solutions.
- Created automated/optimized sheets to remove unnecessary time usage on unrelated items.

Projects

Full Stack Website

Air Traffic Informer

Coded in JavaScript

- Objective was to plot aviation flight history in the US using historical flight data.
- Fully Functional Front and Back end with API.
- Utilizes MongoDB as the database for the Back end API routes.
- Front end is fully done in React Native.
- Link to Website - <https://air-traffic-informer.onrender.com/>
